

FOR IMMEDIATE RELEASE | Thessaloniki, Greece – June 2025

Setting the Standard: New KPI Framework Quantifies the Impact of HealthTech in Transitional Care

THESSALONIKI — EVOLVE2CARE has achieved a critical milestone with the publication of [Deliverable 1.2](#), establishing a standardized KPI & Impact Assessment Framework. This document provides the “quantifiable measures” essential for validating Living Lab impact, moving the sector away from anecdotal evidence toward “regulatory readiness.”

The framework introduces two distinct repositories: the **Use Case Evaluation KPI Repository** (focusing on user alignment) and the **Impact Assessment KPI Repository** (measuring social and economic differentiators). A strategic emphasis is placed on “Ecological Validity” and “External Validity”—ensuring that technologies perform as well in a patient’s home as they do in a controlled lab.

The 7 Value Categories for Living Lab Impact

1. Enhanced collaboration and networking possibilities
2. Validity and reliability (Ecological & External)
3. Improved innovation
4. Financial and process benefits
5. Benefits for the users and society
6. Safe environment for RDI (Research, Development, and Innovation)
7. Increased skills and capabilities

About EVOLVE2CARE

EVOLVE2CARE is a Coordination and Support Action (CSA) dedicated to strengthening HealthTech experimentation in transitional care. The consortium brings together five leading organisations: Aristotle University of Thessaloniki (AUTH), the European Network of Living Labs (ENoLL), Sploro, Anthology Ventures, and VILABS.

Funding Statement: This project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement N° 101158152.
